DekStrip by THERMAL-TEC

Leaky building connections are a serious problem to deal with and/or solve. You know water is costing you money, product and possibly your new hire.

Roof and Wall Connections

Gutter Connections

Corner Connections

DekStrip stops water leaks at ...

Transitions, and prevents water entering at the eaves of your roof.

Fast Fact According to the Centers for Disease Control and Prevention, the average hospital cost of a slip and fall is more than \$30,000. Isn't there a better way to use your profits?

DekStrip, How It Works

DekStrip is a product designed to specifically fix connections, and stop leaks in pre-engineered buildings. **DekStrip** is a flexible material that conforms to the profile of the roof panel. It is then secured to the roof, and finished with a self-leveling sealant. Contact us today to see how we can help stop your connection leaks.

Fast Fact One cubic foot of water weighs 62.5 pounds! Something has to give, usually it's your roof.
