

DekStrip by Thermal-Tec

DekStrip stops leaks at entry points such as:

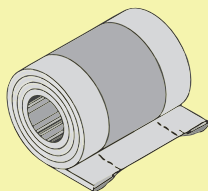

When partnering with a company we use the best solutions to restore their roof. **DekStrip** is an integral part of our arsenal. Read through this pamphlet to learn why **DekStrip** is part of the **Thermal-Tec Difference**.

DekStrip: How It Works

DekStrip is a product designed specifically to fix connections and stop leaks in pre-engineered buildings.

DekStrip is a flexible material that conforms to the profile of the roof panel. It is then secured to the roof and finished with a self-leveling sealant. Contact **Thermal-Tec** today to learn more about how we can help stop your connection leaks.

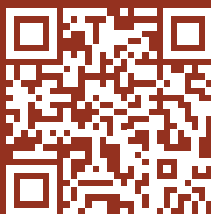

Roof Connections: Sealed

Leaky building connections can create serious problem areas on any roof. At **Thermal-Tec** we use **DekStrip** to solve this issue and save our partner companies money by keeping their buildings, products, and employees dry.

Slip Prevention

According to the Centers for Disease Control and Prevention, the average hospital cost of a slip and fall is more than \$30,000. **Thermal-Tec** uses **DekStrip** to prevent accidents from even happening.
